

Updates on Stelios' Fly Tying lamp

Click [here](#) for the previous article on the lamp.

Says Stelios:

I have made the lamp for the club as requested by you at the last meeting.

Some changes from the one I brought at the last meeting:

1. the box stand is a bit larger - I could not find a smaller one
2. I used two LED strips with diffuser lens. Bruce indicated that the light that I brought was a bit too bright for the camera to focus.
3. I found that parts had gone up in price....blame whoever for that!

Total costs (R701) itemised below - cost more than the last one I made - mainly because of the increased cost of the transformer. I have all the receipts if you need them

1 meter PVC conduit	20.00
25mm PVC right angled elbow	6.95
PVC coupling	1.25
Dome lid	3.19
Dome lid gland	1.14
